Species Checklist  
– Species with vouchers**

**Compiled by:**

**Royal Botanic Gardens, Kew**

**Version: 15 September 2010**

This checklist (**South Georgia Checklist – Species with vouchers**) was generated by combining the specimen data held at the British Antarctic Survey (BAS) herbarium (AAS) and at the Royal Botanic Gardens (RBG), Kew herbarium (K) using Brahm's software (version 6). The checklist only includes the names of species that are vouchered – a specimen deposited in one or both of the herbaria previously listed.

There is a second checklist available (**South Georgia Checklist – All recorded species**) for download on the same webpage

(<http://dps.plants.ox.ac.uk/bol/Southgeorgia/GroupResources/Index>) that lists all names that have been recorded for South Georgia – either from literature and personal communications.
